PREFAȚA

Cercetarea în domeniul istoriei și îndeosebi al geografiei istorice a țării noastre întîmpină unele dificultăți datorită numelor diferite de localități, consemnate în documente, în decursul timpurilor.

Cu deosebire în Transilvania, datorită împrejurărilor politice complexe, dificultățile de identificare a diverselor nume de localități se întîlnesc la tot pasul.

Stăpînirea habsburgică din secolele XVIII și XIX a dat denumiri germane multor localități din Transilvania chiar și unora unde nu locuia populație germană.

În mai mare măsură a contribuit la schimbarea numelor originare de localități nobilimea maghiară încă în evul mediu, dar mai ales în secolul al XIX-lea și în primele decenii ale secolului al XX-lea, cînd guvernele aristocrației maghiare au dus o politică specială de maghiarizare forțată a românilor. În cele mai multe cazuri numele de localități au fost schimbate, alteori au fost traduse numele originare în limba maghiară. Astfel, de exemplu, satul Albac, căruia ungurește i se zice Albák, a devenit Fehérvölgy; Neagra, ungurește Nyágra, a devenit Feketevölgy; Măguri (r. Cluj), ungurește Magura, a fost transformat în Szamosfő; Săcătura, ungurește Szakatura (r. Dej), a devenit Szakadás, iar Săcătura (r. Cîmpeni), ungurește Szekatura, a fost schimbat în Aranyosvágás, și așa mai departe. Exemplele s-ar putea înmulți.

Pînă în prezent nu există un dicționar istoric, întocmit pe baze științifice, cu ajutorul căruia cercetătorul să se poată orienta în acest labirint al numirilor de localități din Transilvania.

Silvestru Moldovan și Nicolae Togan, în Dicționarul numirilor de localități cu populațiune română din Ungaria, *tipărit la Sibiu, în* 1909, *din încredințarea Astrei și retipărit neschimbat în 1919, dau numai numirile vechi românești și ungurești ale localităților din Transilvania.*

Dicționarul Transilvaniei, Banatului și celorlalte ținuturi alipite, *tipărit la Cluj, în 1921, de C. Martinovici și N. Istrate, cuprinde, în mare parte, tot vechile numiri românești ale localităților, dar dă numirile ungurești cele mai noi.*

N. Istrate, în Indicatorul comunelor din Ardeal și Banat, *publicat la Cluj, în 1925, dă și o parte din noile numiri românești ale localităților.*

https://biblioteca-digitala.ro

Indicatorul statistic al satelor și unităților administrative din România, *tipărit la București, în 1932, de Comisia recensământului general al populației, în baza recensământului din 29 decembrie 1930, precum și* Recensământul general al populației României 1930, *publicat ulterior, în 1928, dau numai numirea actuală a localităților.*

„Indicatorul alfabetic al localităților din R.P.R", *publicat la București, în 1954, precum și cel din 1956, dau, de asemenea, numai numirea actuală a localităților. Indicatorul din 1956 face însă și cîteva trimiteri de la numirile vechi la cele noi, de ex.: Binți nți, vezi denumirea oficială Aurel Vlaicu; Banabic, vezi Vîlcele ș.a., dar și acolo, la numirea cea nouă nu se menționează numirea veche de la care s-a făcut trimiterea.*

Avem deci dicționare care dau numirile localităților din Transilvania anterioare unirii din 1918; avem apoi indicatoare care dau numirea actuală, dar nu avem un dicționar care să ne dea laolaltă numirea actuală, numirea sau numirile românești dinainte de unire și trimiterile de la numirile vechi la cele noi, nici numirea sau numirile ungurești și germane mai vechi sau mai noi.

Prezenta lucrare este un dicționar istoric al localităților existente și dispărute din Transilvania, pe baza materialului toponimic documentar, începînd de la primele mențiuni documentare (a. 1075) pînă în zilele noastre, pentru a se vedea evoluția numirilor de localități în limbile română, maghiară și germană, în decursul timpurilor.

Îndemn la aceasta mi-a dat faptul că, lucrînd ca cercetător științific la Institutul de istorie al Academiei Republicii Socialiste România, Filiala Cluj, am avut, între altele, și sarcina de a identifica localități din documentele publicate în cele 6 volume de „Documente privind istoria României", seria C. Transilvania, *apoi încredințarea de a lucra în colectiv la întocmirea indicelui celor 6 volume de documente menționate, subsemnatului revenindu-i mai ales sarcina întocmirii indicelui toponomic.*

În fișe, la numirea de bază a localităților, am trecut mai întîi datele istorico-toponimice din cele 6 volume de documente ale Transilvaniei, pentru intervalul 1075—1350, pînă unde se extinde publicația, întregindu-le apoi cu datele din lucrările lui Csánki, Pesty, Scheiner etc.; din publicațiile de documente: Zimmermann, Székely oklevéltár, Anjou, Károlyi, Zichy, Csáky, Teleki, Bánffy, Mihályi, Densușianu, Pușcariu, Veress, Documenta Valachorum etc.; din monografiile fostelor județe (comitate) întocmite de Márki, Petri, Kádár, Borovszky, Jakó, Maksai, Bélay ș.a.; cu date inedite din Arhivele Statului din Cluj și din Arhiva istorică a Academiei Republicii Socialiste România, Filiala Cluj, precum și cu numirile localităților aflătoare în 6 conscripții din secolele XVIII și XIX și cu date din

https://biblioteca-digitala.ro

dicționarele Lipszky, Lenk, Nagy, Fényes, Moldovan-Togan; din Șematisme și din Indicatorul maghiar al localităților (Helységnévtár) din 1913, *adăugînd în paranteze și izvoarele formelor documentare, pentru a se putea controla proveniența diferitelor numiri.*

În decursul întocmirii lucrării, regretatul profesor universitar Silviu Dragomir dîndu-mi sugestia să cuprind în dicționar, aparte, și lista localităților dispărute, am întreprins și această operație.

Am socotit necesar să nu precupețesc nici o osteneală pentru identificarea, diferitelor nume de localități întîlnite în documentele vremii, atît a celor existente cît și a celor dispărute, care este de foarte mare importanță pentru oamenii de știință. Numirile de localități uneori pot întregi și golurile transmisiunii documentare.

Pentru istorici, spune acad. Iorgu Iordan, „toponimia poate fi socotită drept istoria nescrisă a unui popor, o adevărată arhivă, unde se păstrează amintirea atîtor evenimente, întîmplări și fapte mai mult sau mai puțin vechi sau importante, care s-au petrecut de-a lungul timpurilor și au impresionat într-un chip oarecare sufletul popular“ (Toponimia românească, *p. 2*).

Pentru lingvișți apoi, toponimicele pot avea importanță prin aspectul lor fonetic, putînd da și prețioase indicații cronologice și alte indicații istorice, după cum pe drept cuvînt remarcă acad. Emil Petrovici (Continuitatea daco-română și slavii, *p. 8-9, respectiv p. 871—872*).

Pentru geografi, nu mai e nevoie să accentuăm, un dicționar de geografie istorică, care să cuprindă nomenclatura din prezent și trecut a localităților existente și numirile așezărilor dispărute de pe teritoriul Transilvaniei, este un istrument de lucru absolut indispensabil.

Dicționarul are două părți: I. Localități existente; II. Localități dispărute.

În partea I dăm denumirea actuală a tuturor localităților din Transilvania, după „Indicatorul alfabetic al localităților din Republica Populară Română”, *din 1956, urmată de numirea sau numirile românești, unguresti și germane din 1918, după dicționarele lui Moldovan-Togan și Martinovici-Istrate, apoi raionul și regiunea, după împărțirea administrativă din 1960, cu modificările intervenite pînă în prezent (1966). Urmează după aceea datele documentare: anii cu numirile localității, în ordine cronologică, și unele precizări legate de aceste date. În paranteze dăm indicațiile bibliografice, pentru a se putea face mai ușor controlul datelor din izvoarele documentare utilizate și pentru ca cei intersați să-și poată completa informația istorică, ori de altă natură, de care vor avea lipsă.*

În partea a II-a a dicționarului dăm, tot în ordine alfabetică, localitățile dispărute de pe teritoriul Transilvaniei, trecînd drept cuvînt de bază numirea cea

https://biblioteca-digitala.ro

mai veche a localității întîlnită în documente, urmată de datele și formele istorice, tot în ordine cronologică, și de localizarea localității dispărute.

Numărul localităților dispărute este foarte mare, mai ales în Banat și în fostele comitate Arad, Zarand și Bihor, care au fost veacuri de-a rîndul sub stăpînire turcească.

La sugestia tovarășului acad. Constantin Daicoviciu, am adăugat separat și un tabel al localităților dacoromane dispărute, de pe teritoriul actual al Transilvaniei, cu localizarea lor. Îi mulțumesc pentru sugestia și controlul acestui tabel.

În prima ei redactare lucrarea cuprindea, pe lîngă numirile din trecut ale localităților, și rezumatul evenimentelor legate de trecutul lor istoric; în ultima formă am lăsat numai unele numiri ca: civitas, oppidum, castrum, villa, possessio, praedium etc.

După cum este firesc, un dicționar istoric al localităților din Transilvania nu poate avea pretenția să utilizeze întregul material documentar edit și inedit. Ne dăm seama că pe lîngă toate completările și revizuirile făcute, vor mai exista unele lacune, deficiențe și poate chiar greșeli.

Cu toate deficiențele, acest dicționar de geografie istorică, lucrare unică în acest gen în limba română, va umple un gol de mult simțit și va fi un instrument bun de lucru, punînd totodată un bogat material informativ la dispoziția istoricilor, arheologilor, geografilor, lingviștilor, economiștilor și tuturor acelora care vor avea de a face cu probleme unde se întîlnesc numiri de localități în diferite momente istorice. Iar marele public, și îndeosebi cercetătorii, pot afla vechimea documentară a localității lor de naștere și a altor localități din Transilvania care îi vor interesa, și în baza indicațiilor bibliografice vor putea consulta izvoarele documentare, pentru a putea afla diferitele evenimente care se leagă de acele date sau evenimente istorice.

Necesitatea acestui dicționar o vădește și faptul că după ce el a fost terminat în prima redactare, deja în manuscris a fost consultat, la Institutul de istorie din Cluj, și acasă la autor, de academicieni, profesori universitari, cercetători științifici de la diferite institute ale Academiei, de studenți și intelectuali din Cluj și din provincie. Identificări de localități s-au cerut autorului și de oameni de știință din Capitală, care știau despre pregătirea acestui dicționar.

Țin să mulțumesc tuturor celor care, într-un sens sau altul, mi-au dat binevoitorul concurs și îndeosebi academicianului Constantin Daicoviciu, directorul Institutului de istorie din Cluj, apoi profesorilor universitari Ștefan Pascu și Sigismund Jakó, referenții științifici ai lucrării, pentru sugestiile și propunerile utile făcute, precum și Editurii Academiei Republicii Socialiste România pentru munca depusă în vederea definitivării textului lucrării pentru tipar.
